OTL PRODUCTS SPECIFIED:

OTL Complete Level Access wet room floor systems

PROJECT OVERVIEW

OTL met with Pure Gym in 2014. Ever since, we have been contacted by a number of their main contractors taking on the huge development plans to build and develop a large number of Pure Gyms in different locations over the UK.

On The Level supplied custom formers to be used as a drain off area outside the main showering areas. These formers ranged from sizes up to as big as 3.9m x 1.8m per former to be used in both male and female shower areas. Once fitted, the formers were covered in a non-slip vinyl sheet flooring.

Once the floor design had been agreed, On The Level manufactured the formers within 5-7 working days. This made for a quick and very beneficial product to be used as in previous scenarios, the confirmation of the gradient outside the shower cubicle had to be made up using panelled materials, which can be inaccurate and lead to movement later on after completion.
