On The Level

Wet Floors

A new building in Stratford has recently been completed providing comfortable student accommodation. On The Level supplied 60 custom formers measuring 1,200 by 1,200mm for the project. All formers have a central waste and standard gully and were designed for level access wet rooms installed in accessible bathrooms with vinyl sheet flooring. The floors in the Stratford building are concrete and the advantage of specifying a wet room former is that the fall is guaranteed, rather than the contractor trying to get the correct fall in the screed by hand.
